### **Restriction Requirement**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, 19, 22-38, drawn to an articulator ("occludator") and system with articulator, classified in class 433, subclass 54.
- II. Claims 15-18, drawn to a face bow, classified in class 433, subclass 73.
- III. Claim 40, drawn to a joint reproducing system, classified in class 433, subclass 68.

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as an articulator for designing artificial teeth, subcombination II has separate utility such as diagnosing jaw movements and subcombination III has separate utility of recording jaw movements. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a

Art Unit: 3732

claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
